# THE BEANS

Our coffee blend is expertly produced from 70% Arabica and 30% Robusta beans. This distinctive mix produces a harmonious balance of tastes that appeals to a diverse variety of coffee enthusiasts. Arabica beans are known for their smooth, well-rounded flavor and mild notes of sweetness, whilst Robusta beans provide a strong, full-bodied richness with a hint of natural bitterness. Together, they provide a coffee that is both nuanced and fulfilling.

We source our beans from the Benguet Province and blend Arabica and Robusta to make a coffee that is both sophisticated and appealing. The smooth, moderately acidic, and subtly sweet Arabica complements the strong, rich Robusta. This balance makes our coffee perfect for a variety of brewing methods, including espresso and drip coffee.

Each cup shows our commitment and competence, providing a wonderful and memorable experience for both seasoned coffee drinkers and casual customers.
